

MAHARAJ SHREE KUMAR SOOD, CISSP

Lead Cybersecurity Consultant | Automotive · ICS/OT · Product Security

“Cybersecurity, engineered in - not bolted on.”

Gurgaon, India · +91 97113 91314 · bharatvarshsingh@gmail.com · [Professional Web Portfolio](#) · [LinkedIn - Maharaj Sood](#)

PROFESSIONAL SUMMARY

CISSP-certified cybersecurity consultant with 12+ years across automotive, ICS/OT, and embedded platforms, advising OEMs, suppliers, and critical-infrastructure operators on the full cybersecurity lifecycle; from security-by-design architecture through type approval and validation. Delivery record spans 4 OEMs, 20+ vehicle and ECU-level TARAs, and 2 CSMS/SUMS programmes.

Combines deep standards expertise (ISO/SAE 21434, UNECE R155/R156, IEC 62443, NIST CSF) with consultative engagement across RFI/RFP/RFQ scoping, solution architecture definition, and client-facing advisory for complex cybersecurity programmes.

DOMAIN COVERAGE & CAPABILITY

DOMAIN	FRAMEWORKS & STANDARDS	LEVEL
Automotive Cybersecurity	ISO/SAE 21434 · UNECE R155/R156 · ISO 24089 · AIS-189/190	●●●●● Expert
ICS / OT Security	IEC 62443 · NIST CSF 2.0 · NERC-CIP · NCIIPC	●●●●● Expert
Embedded & Product Security	Secure boot · secure debug · FOTA · secure SDLC	●●●●○ Advanced
Security Architecture & Security-by-Design	TARA · threat modelling · zones & conduits · PKI	●●●●○ Advanced
Enterprise Security & GRC	CISSP (8 domains) · ISO 27001 · EU CRA · RED	●●●●○ Advanced
Pre-sales & Solution Scoping	RFI / RFP / RFQ · solution definition · bid support	●●●●○ Working
Cloud & AI Security Governance	ISO 42001 · EU AI Act · OWASP LLM Top 10	●●○○○ Foundational

●●●●● Expert ●●●●○ Advanced ●●●○○ Working ●●○○○ Foundational / in development

PROFESSIONAL EXPERIENCE

Lead Cyber Consultant - Thales

Noida, India

Apr 2022 – Present

CYBERSECURITY ENGINEERING, TARA & TYPE APPROVAL

- Led 20+ vehicle and ECU-level TARAs across 4 OEM programmes, analysing 100+ attack scenarios through structured workshops at ECU, system, and vehicle layers to produce prioritised security requirement sets.
- Delivered ISO/SAE 21434 work products from concept through post-development, embedding security-by-design across the connected-ECU product lifecycle.
- Built 2 CSMS/SUMS programmes to an audit-ready state against UNECE R155/R156 and AIS-189/190, including process definition and the work-product evidence required for type-approval submission.
- Validated secure boot, secure debug, and FOTA update mechanisms, mapping attack paths from the connected gateway through to powertrain ECUs.

ICS / OT RISK ASSESSMENT & INDUSTRIAL SECURITY

- Conducted IEC 62443-aligned risk assessments of SCADA, DCS, and SIS environments across multiple geographically distributed plant sites, producing zones-and-conduits segmentation plans.
- Authored cybersecurity policies, procedures, and security architecture guidelines aligned to IEC 62443 and NIST CSF, adopted as reference standards across the power sector.

PRESALES, SOLUTION SCOPING & BID SUPPORT

- Scoped solution architecture and shaped technical responses for cybersecurity RFI/RFP/RFQ tenders, translating regulatory drivers into deliverable scope and effort estimates.
- Supported client-facing advisory engagements, positioning cybersecurity services against customer regulatory timelines and programme constraints.

SECURITY LAB GOVERNANCE & ISMS ASSURANCE

- Owned end-to-end procurement of penetration-testing lab infrastructure, from technical specification through vendor selection and commissioning.
- Established lab security policies and procedures and drove the ISO 27001 assessment for the facility.

Technical Lead - HCL Technologies

Apr 2021 – Apr 2022

Noida, India

- Led TARA activities for connected vehicle platforms and infotainment systems.
- Assessed FOTA architecture and Android connected applications; designed and validated secure boot and firmware update mechanisms for ECU software integrity.
- Defined cybersecurity requirements and mitigation strategies aligned to NIST and OWASP.

Senior Security Developer - Marelli India Pvt Ltd.

Sep 2018 – Mar 2021

Manesar, India

- Developed secure embedded software for Body Control Modules and instrument cluster ECUs across global OEM programmes, owning security-relevant functions through design, implementation, and validation.
- Implemented secure remote keyless entry, anti-theft, and immobiliser mechanisms, ensuring the confidentiality and integrity of authentication frames.
- Applied MISRA and CERT-C secure coding standards across production ECU software; modelled software architecture in Enterprise Architect for scalable, secure ECU design.

SPEAKING & THOUGHT LEADERSHIP

Regular speaker and trainer on automotive and ICS/OT cybersecurity across industry forums and professional bodies. Selected engagements:

CAEV Expo 2026, Bengaluru - represented Thales on automotive cybersecurity and India's AIS-189/190 regulatory roadmap.

Automotive ISAC, 2025 - invited speaker on IT/OT convergence across connected-vehicle and manufacturing ecosystems.

The Practitioner's Guide to the EU Cyber Resilience Act - author, ongoing LinkedIn newsletter for product manufacturers.

ICS/OT Cybersecurity - published practitioner course (CyberFrat) on industrial fundamentals, OT risk assessment, and IEC 62443-aligned practice.

EARLIER EXPERIENCE

Embedded Research Engineer - The Hi-tech Robotics Systemz Ltd

Feb 2015 – Sep 2018

Gurgaon, India

Embedded software for robotic surveillance and defence platforms supporting IED detection and remote operations; CAN and CANopen communication architectures for multi-module systems.

Sales Executive – Milagrow Robotics Solutions Ltd

Sep 2014 – Dec 2014

Gurgaon, India

EDUCATION

M.Tech, Embedded Systems - Amity University, Noida (2014) · Silver Medal, 2nd Rank

B.Tech, Electronics & Communication - MRCE, Faridabad (2012)

CERTIFICATIONS

- **CISSP** - Certified Information Systems Security Professional, ISC2 (2026)
- **ISO/IEC 27001:2022** Lead Auditor (TÜV SÜD)
